

Catch & Boost

Playable Ad Concept for Idle Bank Tycoon

Description

- Catch & Boost refers to actual gameplay mechanics of Idle Bank Tycoon, Collection of Money in Main Hall and Boosting Managers.
- Has highly adjustable numerics that can be adjusted for iteration cycles.
- Has an easy to play hook, a rewarding engagement and a clear CTA at the end.

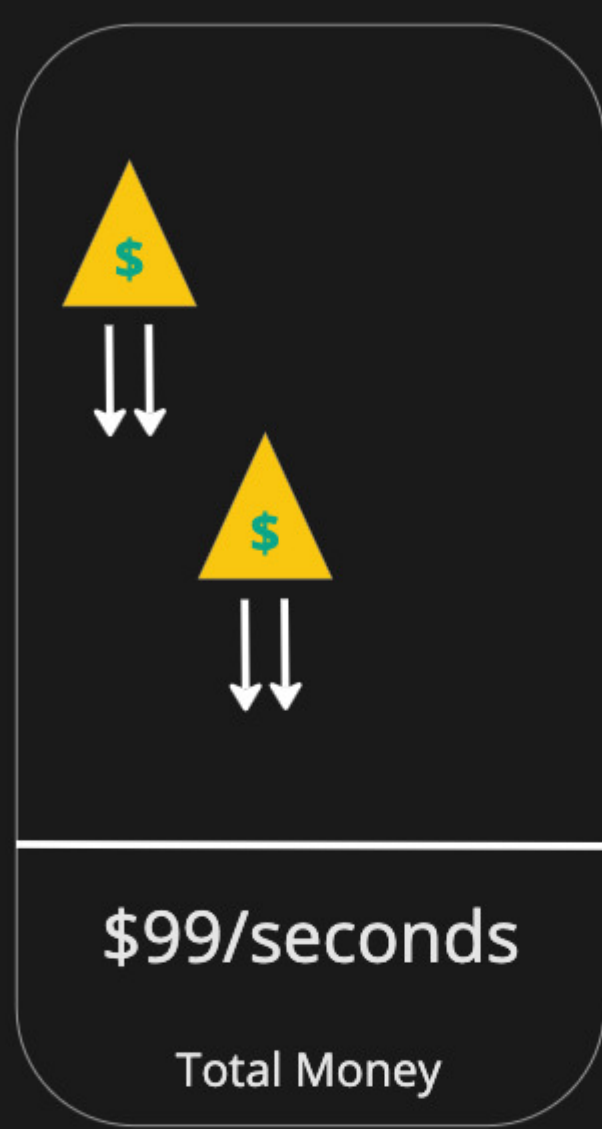

Pros:

1. Having multiple phases increases iteration possibilities
2. Can be split into 2 different ads

Cons:

1. Having multiple phases are not common in playable ads
 - a. However, it may provide new insights

STORYBOARD

Phase 1 / Catch Money

Ad Concept: **Tap to collect** (4 secs)

Catching money, simulates collecting money in *Idle Bank Tycoon*'s main hall.

Pros:

- Easy to grasp mechanic with high relatedness.
- Direct reference to an actual gameplay mechanic.
- Fast progression & hook to start feel of being rewarded

Gameplay:

- Money drops from the top.
- Player taps to collect it.
- Each collected money is added to a counter.
- After 4 money drops, instantly transition to Phase 2.

Design Tips:

- Use **"Touch to Catch"** text to guide the player.
- Use **visual & sound effects** to make a juicy gameplay.
- Ensure **money drops fast** so it doesn't feel slow.

Phase 2 / Upgrade Managers

Ad Concept: **Hire & Boost** (4 secs)

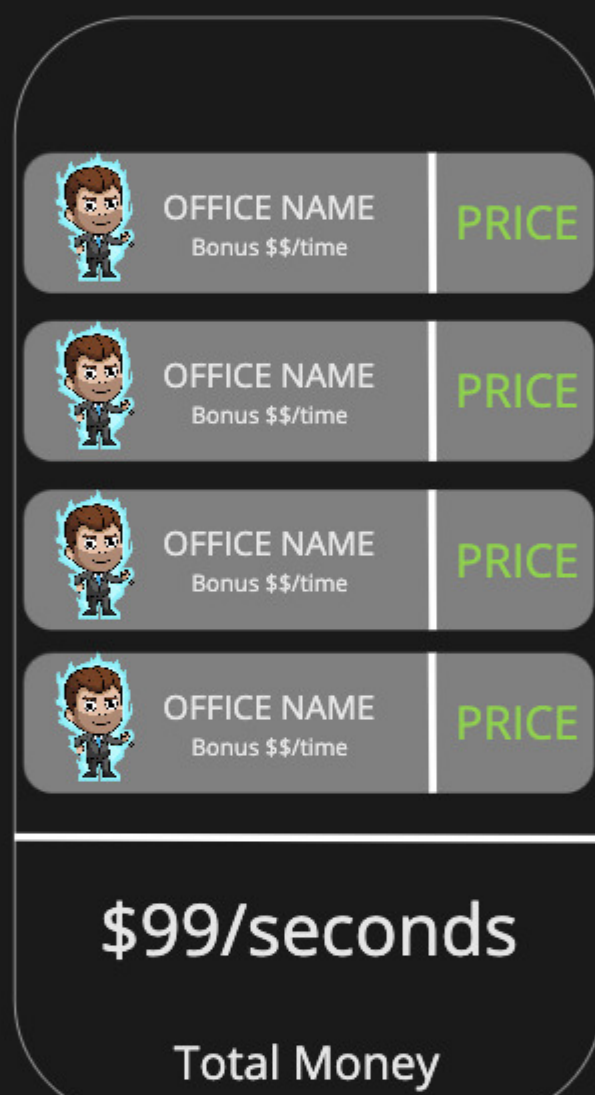

Simulates hiring & boosting managers. Spending money to level up managers to increase income/time.

Pros:

- Easy to grasp mechanic with high relatedness.
- Direct reference to an actual gameplay mechanics.
- Huge progression & engagement to mimic actual gameplay mechanics

Gameplay:

- Player spends collected money to boost managers.
- Each boost increases income (visually displayed on UI).
- After 2-3 boosts, transition to Phase 3.

Design Tips:

- Increase income indicator massively to create a feeling of exponential growth.
- Allow players to pick boosts instead of auto-spending, so they feel in control.
- Use big animations (level-up effects, sound cues, number increases).

Phase 3 / Buy New Bank

Ad Concept: **Tap to Act** (2 secs)

When the required money threshold is reached phase 3 starts. Simulates unlocking a new bank branch.

At the end of this phase, the UI elements will turn into the game logo and CTA with some transitions.

Gameplay:

- Player taps a "Buy New Bank" button (like unlocking a new level).
- A splash art appears in the background to reinforce success.
- Immediately transitions into Phase 4.

Design Tips:

- Use a **golden glow effect** when buying the bank.
- Display a **huge money reward animation** for extra satisfaction.
- Make the **transition smooth (fade in/out, UI scale-up animation)**.

Phase 4 / Call To Action

A common CTA with cool transitions of previous UI elements.

The transition could be supported with an encouraging sound effect.

Gameplay:

- Final UI transforms into game logo + CTA.
- Smooth transitions & sound effects reinforce the experience.
- "Play Now" button appears, leading to the Play Store link.

Design Tips:

- Use a dynamic transition (UI fades out, logo zooms in).
- Big text with high contrast CTA (e.g., "Download Now!").
- Play a final rewarding sound effect to reinforce success.
